

MARCH 25 –
AI FOR WRITING

CLASS ACTIVITY

- Let's compile a list of ways in which AI can be used to aid the writing process in research workflow (just propose ideas and I'll put them on the board)
- Then, to each one add a ranking, from 1 (terrible idea) to 5 (great idea)
- We will discuss the most controversial ones in the next class

OUR BOARD

HOMEWORK 1: WRITING EXPERIENCE

- These were our most controversial picks:

- 1) Adjust tone or format for a written piece (different audience or journal)
- 2) Find titles for papers (say you wrote a paper and want to find a title for it)
- 3) Write a section of a paper
- 4) Write abstracts

- For these tasks,

Discuss: what is your usual planning process? What changes if you do it with AI? What are possible pros and cons?
Report it in our shared doc.

HOMEWORK 2

- For two journals and two funding agencies in your field, find out what is the policy about use of AI in proposals or papers that are submitted and in reviewing them. Report them in our shared doc.
