

APRIL 20
LEARNING A NEW TOPIC

STUDY/LEARN MODES

- <https://openai.com/index/chatgpt-study-mode/> (to get there, you may need to go here first: <https://openai.com/index/chatgpt-study-mode/>, then click on “Try”)
- <https://gemini.google.com/app>
- <https://claude.ai/new>

CLASS ACTIVITY: LET'S TRY THEM OUT

- Think about a topic you are (reasonably) an expert about. It doesn't need to be science-related. If science-related, not excessively technical.
- Write it on a piece of paper. Put in the hat!
- In the meantime, think about 3 questions you can ask someone to test their knowledge of the topic. It's best if they are a little general, not factoids.
- Each person will learn about the new topic, and the "tester" will ask the questions to see if the learner has learned!

TOPICS AND RANDOM LEARNER ASSIGNMENT

- Owen: The French revolution
- Sneha: Weightlifting
- Stefany: Planets
- Tian'ao: Theory of realism in International affairs
- Ariyana: How to replace a spare tire
- Michael: Different types of compact objects
- Arsh: Soccer preparation for the world cup
- James: What factors affect the flavor of coffee
- Amaury: Old Japanese Cinema: Akira Kurosawa
